PROFILE

I am a passionate Flutter developer with a solid foundation in mobile app development. I have hands-on experience building user-friendly applications and am eager to further enhance my skills while contributing to innovative projects. As a junior developer, I am committed to continuous learning and professional growth, and I strive to leverage my abilities to add value to the company by delivering high-quality solutions.

EDUCATION

Bachelor's Degree in Computer Science (Cs Department)

Mansoura University

09/2020 – 07/2024

Mansoura, Egypt

PROFESSIONAL EXPERIENCE

Flutter Developer at ICS For Digital Solution

01/2026 – Present

- Engineered and shipped multiple cross-platform Flutter applications across diverse business domains, serving thousands of end users on both iOS and Android.
- Architected scalable mobile solutions using Clean Architecture, reducing code coupling and accelerating feature delivery by implementing reusable domain and data layers.
- Integrated RESTful APIs and implemented advanced state management using Bloc, Cubit, and Provider to ensure predictable data flow and maintainable UI logic.
- Drove code quality by leading peer code reviews and establishing team-wide Flutter coding standards and architectural guidelines.

Remote

Flutter Developer at Teqnit Almalomat

08/2025 – 12/2025

- work on Two Application that show information about Tourism feild

Mansoura

PROJECTS

Ghanem Pharmacy

Google Play [↗](#)

- An e-commerce app for pharmacies to buy your medicines, with favorites, chat, guest mode, profile, wallet, cash back, dark theme, and saving your address so orders get delivered to you.

Revu

google Play [↗](#) IOS [↗](#)

- REVU is the ultimate platform where honest opinions shape smarter purchases. Whether you're exploring skincare, tech gadgets, or daily essentials, REVU lets you share your experience and help others make informed decisions.

HealCare [↗](#)

05/2025 – 07/2025
Freelance

It is an application with two types of users: **Doctors and Patients**, each having a separate user interface.

The app allows patients to book appointments, rate doctors, receive notifications for all booked appointments, make payments, and engage in real-time chat with doctors. Patients can also search for doctors, add them to favorites, view available time slots for each day, authenticate securely, and upload their medical files.

Doctors can view all booked appointments and choose to accept, delete, or reschedule them. They can also view their payment history, receive daily appointment reminder notifications, and communicate with patients through real-time chat.

FinTech

11/2025 – 12/2025
Remote

- App showing price of Cryptocurrencies : Biometric Auth like Fingerprint and Facial , daily prices , Graphs , payment with Stripe , Profile and theme .

Cotton Cloud [↗](#)

03/2025 – 04/2025
Freelance

- Developed the UI for an e-commerce platform (UI only, no backend integration), including product listing, search and filtering, theming, localization, favorites, notifications, promo codes, blog pages, payment flows, and cart functionality. The UI was structured to support future API integration for product management and checkout.

SpaceX

- App for showing information about Space x company like : about the founder of it , first launches , videos about the spaces and WebView

Nourish Me

03/2024 – 06/2024
Freelance

- It is a comprehensive health and wellness mobile application developed by a team of four members. Key features include user authentication, an in-depth health and lifestyle questionnaire to assess user needs, personalized diet and meal plans, customized workout routines, and structured exercise programs.
